DIRECTORY OF REFRIGERATED WAREHOUSES
IN THE UNITED STATES

The U. S. Department of Agriculture has collected statistical data relating to the refrigerated warehousing industry since 1914. Published monthly in the Cold Storage Report are data on the quantities of various food commodities stored in refrigerated facilities at the close of each month. In addition, a survey of refrigerated warehouse capacity is made biennially to determine the amount of gross and net space, by temperature range, in public, private, and semiprivate facilities.

This is the seventh directory of this kind issued by the Department. The first was issued in 1947, and was brought up to date in 1951, 1953, 1959, 1962 and 1966. Names and locations shown in this directory were compiled from reports in the October 1, 1969 biennial survey of capacity of refrigerated warehouses.

This directory has a threefold purpose:

1. To extend recognition to warehousemen who, year after year, have contributed their time and money to make possible the monthly Cold Storage Reports and related reports on the refrigerated warehousing industry.
2. To provide processors and food handlers with information on storage facilities by location.
3. To furnish research and statistical users of the Cold Storage Report with an indication of the extent of coverage for the monthly reports.

We urge those who use this directory to notify the Statistical Reporting Service, U. S. Department of Agriculture if there are any refrigerated storage facilities, as defined below, which are not listed herein.

Refrigerated Storage Facilities Listed

Refrigerated storage warehouses listed in this directory are facilities artificially cooled to 50° F. or lower in which food commodities are normally stored for 30 days or more. This includes all types of storage businesses having refrigerated storage space--public, private, and semiprivate. Packers and processors are included if they have refrigerated storage space in which commodities are normally held for 30 days or more.

Refrigerated Facilities Not Listed

Not included in the directory are facilities owned by wholesalers, jobbers, or retailers who normally use their storage space for holding commodities less than 30 days. Nor are facilities listed that belong to the Armed Services or to restaurants or other establishments serving food.

The Department's cold storage reporting program does not include frozen food locker plants. Branch distributing houses of meatpackers and meatpacking facilities are not included if refrigerated space is used solely for carcass chilling, cutting, boning, etc., and not for storage purposes.

Arrangement of the Directory

States are arranged alphabetically, as are cities within States. In some cases, the location shown for a warehouse is not the mailing address of the firm.

Companies operating more than one plant are listed in each of the cities where the units are located. Branch plant locations are shown if different from the "parent" warehouse location.

Symbols and Definitions Used in This Directory

- PB - Public cold storage: An artificially cooled warehouse operated to store food for others for pay.
- PR - Private cold storage: An artificially cooled warehouse operated by a producer, processor, or distributor for his own use exclusively and not for the storing of commodities for others for pay.
- SP - Semiprivate cold storage: An artificially cooled warehouse in which the operator stores his own commodities as well as various food commodities for others for pay.
- MP - Meatpacking plant: An establishment engaged in processing meat and meat products for food and having refrigerated storage space for these products.
- PBA - Public apple house
- PEF - Public fish house
- PRA - Private apple house
- PRF - Private fish house
- SPA - Semiprivate apple house
- SPF - Semiprivate fish house
